NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Accounting Practices

The accompanying statutory financial statements of Securian Casualty Company (the Company) have been prepared in accordance with accounting practices prescribed or permitted by the Minnesota Department of Commerce. The Minnesota Department of Commerce recognizes statutory accounting practices prescribed or permitted by the State of Minnesota for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under the Minnesota Insurance Law. Prescribed statutory accounting practices are those practices that are incorporated directly or by reference in state laws, regulations and general administrative rules applicable to all insurance enterprises domiciled in a particular state. Permitted statutory accounting practices include practices not prescribed by the domiciliary state, but allowed by the domiciliary state regulatory authority. The National Association of Insurance Commissioners' (NAIC) Accounting Practices and Procedures Manual, (NAIC SAP) has been adopted as a component of prescribed or permitted practices by the State of Minnesota. The state has adopted the prescribed accounting practices found in NAIC SAP, without modification.

B. Use of Estimates

The preparation of financial statements in conformity with statutory accounting practices requires management to make certain estimates and assumptions that affect the reported assets and liabilities, including reporting or disclosure of contingent assets and liabilities as of the date of the statements of admitted assets, liabilities and surplus and the reported amounts within the statement of income during the reporting period. Future events, including changes in interest rates and asset valuations, could cause actual results to differ from the estimates used in the financial statements.

The most significant estimates include those used in determining loss reserves, impairment losses on investments, and federal income taxes. Although some variability is inherent in these estimates, the recorded amounts reflect management's best estimates based on facts and circumstances as of the statement of admitted assets, liabilities, and surplus date. Management believes the amounts provided are appropriate.

C. Accounting Policy

The Company recognizes premium as earned over the period of risk in proportion to the insurance protection provided.

Expenses incurred in connection with acquiring new and renewal insurance business, including such acquisition costs as sales commissions, are charged to operations as incurred. Investment income is recognized as earned, net of related investment expenses.

In addition, the Company uses the following accounting policies:

1. Cash equivalents and short-term investments are stated at amortized cost, which approximates fair value.
2. Bonds are valued as prescribed by the NAIC. Bonds not backed by other loans are generally carried at cost, adjusted for the amortization of premiums, accretion of discounts, and any impairment. Premiums and discounts are amortized and accreted over the estimated lives of the related bonds based on the interest-yield method. Prepayment penalties are recorded to net investment income. The Company's bond portfolio is reviewed quarterly and as a result the carrying value of a bond may be reduced to reflect changes in valuation resulting from asset impairment. Bonds which have been assigned the NAIC category 3 thru 6 designations are written down to the appropriate NAIC carrying value.
3. The Company has common stock valued at NAIC fair value.
4. The Company has no preferred stocks.
5. The Company has no mortgage loans.
6. Loan-backed securities are stated at either amortized cost or the lower of amortized cost or fair market value. The Company's loan-backed securities are reviewed quarterly and as a result the carrying value of a loan-backed security may be reduced to reflect changes in valuation resulting from new discounted cash flow information. Loan-backed securities which have been assigned the NAIC category 3 thru 6 designations are written down to the appropriate NAIC carrying value. The Company uses a third party pricing service in determining the market value of most loan-backed securities. A small number of holdings are priced by brokers or internally utilizing estimated cash flows. The retrospective adjustment method is used to record investment income on all securities except for interest only securities or other non-investment grade securities where the yield had become negative. Investment income is recorded using the prospective method on these securities.
7. The Company does not have any non-insurance subsidiaries.
8. The Company's other invested assets consist 100% of surplus notes. Surplus notes with an NAIC designation of NAIC 1 or NAIC 2 are reported at amortized cost. Surplus notes with an NAIC designation equivalent of NAIC 3 through NAIC 6 are reported at the lesser of amortized cost or fair value. An OTTI is considered to have occurred if it is probable that the Company will be unable to collect all amounts due according to the contractual terms of the surplus note. If it is determined that a decline in fair value is other than temporary, an impairment loss is recognized as a realized loss equal to the difference between the surplus note's carrying value and the fair value and is reported in earnings.

C. Accounting Policy (Continued)

9. The Company has no derivative instruments.
10. The Company does not anticipate investment income when evaluating the need for premium deficiency reserves.
11. Unpaid losses and loss adjustment expenses include an amount determined from individual case estimates and loss reports and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on assumptions and estimates and while management believes the amount is adequate, the ultimate liability may be in excess of or less than the amount provided. The methods for making such estimates and for establishing the resulting liability is continually reviewed and any adjustments are reflected in the period determined.
12. The Company has not modified its capitalization policy from the prior period.
13. The Company does not have pharmaceutical rebate receivables.

D. Loan-Backed Securities

1. Describe sources used to determine prepayment assumptions

Prepayment assumptions for single class and multi-class mortgage-backed/asset-backed securities were obtained from Bloomberg when available. Other payment speed assumptions for a small number of holdings were reviewed with the appropriate affiliated company analyst by evaluating the underlying collateral.

2. There were no other than temporary impairments (OTTI) recorded as of December 31, 2020, due to the present values of cash flows expected to be collected being less than the amortized cost basis of the securities. There were no OTTI recorded as of December 31, 2020, due to management's intent to sell or inability to hold a security until recovery.

3. As of December 31, 2020, The Company did not hold any securities for which an OTTI has previously been recognized.

4. All impaired securities (fair value is less than cost or amortized cost) for which an other-than-temporary impairment has not been recognized in earnings as a realized loss (including securities with a recognized other-than-temporary impairment for non-interest related declines when a non-recognized interest related impairment remains):

a. The aggregate amount of unrealized losses:

1. Less than 12 months	\$	(149,221)
2. 12 months or longer	\$	(19,912)

b. The aggregate related fair value of securities with unrealized losses:

1. Less than 12 months	\$	7,570,231
2. 12 months or longer	\$	980,428

5. In determining whether a decline in value is other than temporary, the Company considers several factors including, but not limited to the following: the extent and duration of the decline in value; the Company's ability or lack of intent to retain the investment for a period of time sufficient to recover the amortized cost basis; and the performance of the security's underlying collateral and projected future cash flows. In projecting future cash flows, the Company incorporates inputs from third-party sources and applies reasonable judgment in developing assumptions used to estimate the probability and timing of collecting all contractual cash flows.

The Company is involved in various pending or threatened legal proceedings arising out of the normal course of business. In the opinion of management, the ultimate resolution of such litigation will not have a material adverse effect on operations or the financial position of the Company.

In the normal course of business, the Company seeks to limit its exposure to loss on any single insured and to recover a portion of benefits paid by ceding reinsurance to other insurance companies (reinsurers). To the extent that a reinsurer is unable to meet its obligations under the reinsurance agreement, the Company remains liable. The Company evaluates the financial condition of its reinsurers and monitors concentrations of credit risk to minimize its exposure to significant losses from reinsurer insolvencies. Allowances are established for amounts deemed uncollectible.

At December 31, 2020 and 2019 the Company had no admitted assets in accounts receivable for uninsured plans and \$31,995,338 and \$27,698,516 respectively, in amounts due from agents. The Company routinely assesses the collectibility of these receivables. Based upon Company experiences, less than 1% of the balance may become uncollectible and the potential loss is not believed to be material to the Company's financial condition.

20. Fair Value Measurements

- A. The fair value of the Company's financial assets and financial liabilities has been determined using available market information as of December 31, 2020. Although the Company is not aware of any factors that would significantly affect the fair value of financial assets and financial liabilities, such amounts have not been comprehensively revalued since those dates. Therefore, estimates of fair value subsequent to the valuation dates may differ significantly from the amounts presented herein. Considerable judgment is required to interpret market data to develop the estimates of fair value. The use of different market assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date. In determining fair value, the Company primarily uses the market approach which utilizes process and other relevant information generated by market transactions involving identical or comparable assets or liabilities. To a lesser extent, the Company also uses the income approach which uses discounted cash flows to determine fair value. When applying either approach, the Company maximizes the use of observable inputs and minimizes the use of unobservable inputs. Observable inputs reflect the assumptions market participants would use in valuing a financial instrument based on market data obtained from sources independent of the Company. Unobservable reflect the Company's estimates about the assumptions market participants would use in valuing financial assets and financial liabilities based on the best information available in the circumstances.

The Company is required to categorize its financial assets and financial liabilities carried at fair value on the statutory statements of admitted assets, liabilities and capital and surplus according to a three-level hierarchy. A level is assigned to each financial asset and financial liability based on the lowest level input that is significant to the fair value measurement in its entirety. The levels of fair value hierarchy are as follows:

Level 1 – Fair value is based on unadjusted quoted prices for identical assets or liabilities in an active market.

Level 2 – Fair value is based on significant inputs, other than quoted prices included in Level 1, that are observable in active markets for identical or similar assets and liabilities.

Level 3 – Fair value is based on at least one or more significant unobservable inputs. These inputs reflect the Company's assumptions about the inputs market participants would use in pricing the assets or liabilities.

The Company uses prices and inputs that are current as of the measurement date. In periods of market disruption, the ability to observe prices and inputs may be reduced, which could cause an asset or liability to be reclassified to a lower level.

Inputs used to measure fair value of an asset or liability may fall into different levels of the fair value hierarchy. In these situations, the Company will determine the level in which the fair value falls based upon the lowest level input that is significant to the determination of the fair value.

The following risks and uncertainties, among others, may have such an effect:

NOTES TO FINANCIAL STATEMENTS

21. Other Items (Continued)

F. Subprime Mortgage Related Risk Exposure

- The Company identifies subprime exposure through its affiliate's asset manager, Securian Asset Management, Inc. The classification of an individual security as "subprime" is a designation assigned by the underwriting analyst and reviewed by the portfolio manager on a transaction-by-transaction basis.

Securian Asset Management, Inc. identifies subprime exposure on a transaction-by-transaction basis primarily on the basis of a consideration of borrower credit (FICO) scores, weighted-average loan rates, loan-to-value ratios, documentation standards and loan type. Other factors, such as loan sizes, loan originators and syndication agents are considered, but are rarely determinative in isolation.

Securian Asset Management, Inc. manages subprime risk for the Company in several ways.

- First and foremost, subprime risk in all portfolios is limited due to investment policy guidelines: the market value of subprime investments is small as a percentage of total assets and the majority of that market value is invested in AAA-rated securities.
 - Second, Securian Asset Management, Inc.'s investment process includes thorough monthly surveillance of every structured finance asset, including subprime Residential Mortgage Backed Securities. The surveillance process is designed to alert analysts and portfolio managers to deteriorations in collateral performance well in advance of any adverse impact on security market value or security losses. With this foresight, proactive trades can be executed to protect the value of the portfolio.
 - Finally, Securian Asset Management, Inc. actively manages portfolios to mitigate or eliminate potential adverse events.

 - The Company currently does not hold any subprime securities.
