After the Benefit Date, withdrawals for the contract year less than or equal to GAI or required minimum distribution (RMD) do not reduce GAI, Benefit Base or Enhancement Base. Excess withdrawal amounts (amounts for contract year exceeding greater of GAI or RMD; or, any withdrawal prior to Benefit Date) reduce Benefit Base and Enhancement Base proportionately based on ratio of excess amount to contract value. GAI is then recalculated. All withdrawals reduce contract value.

An annuity is intended to be a long-term, tax-deferred retirement vehicle. Earnings are taxable as ordinary income when distributed, and if withdrawn before age 59½, may be subject to a 10% federal tax penalty. If the annuity will fund an IRA or other tax qualified plan, the tax deferral feature offers no additional value. Qualified distributions from a Roth IRA are generally excluded from gross income, but taxes and penalties may apply to nonqualified distributions. Please consult a tax advisor for specific information. There are charges and expenses associated with annuities, such as surrender charges (deferred sales charges) for early withdrawals. Variable annuities have additional expenses such as mortality and expense risk, administrative charge, investment management fees and rider fees. Variable sub accounts of annuities are subject to market fluctuation, investment risk and loss of principal.

The guarantees are subject to the financial strength and claims-paying ability of the issuing insurance company. The guarantees have no bearing on the variable investment performance.

If a client's annuity includes Credit Enhancements, the Credit Enhancement is treated as earnings for the purposes of calculating benefits with the contract such as the Guaranteed Minimum Death Benefit or any optional living or death benefit. All death benefits payable will be reduced by any Credit Enhancement applied within 12 months of death. We reserve the right to limit the death benefit to the contract value in lieu of any other death benefit value payable if we receive proof of death more than one year after the date of death.

MyPath optional lifetime income benefits establish a Benefit Base for calculating guaranteed annual income. The Benefit Base provides no minimum contract value or investment return and is not available for withdrawal. Withdrawals exceeding allowed guidelines, or taken before the Benefit Date, may have a negative impact on the guarantees of these optional living benefits. All withdrawals reduce the Contract Value. These benefits cannot be cancelled and require use of an approved asset allocation strategy. The guarantees are subject to the financial strength and claims-paying ability of Minnesota Life. The guarantees have no bearing on performance of the variable investment options. These benefits are available on a single or joint life basis for an additional cost with a variable annuity and are based on state approval.

MultiOption annuities and MyPath optional lifetime income benefits may not be approved in all states and product features may vary by state. We reserve the right to limit or discontinue acceptance of future purchase payments after the contract is issued. This may limit the ability to increase the contract value through additional purchase payments. If an optional benefit is elected in the contract, this may also limit the ability to increase the value used to calculate the optional benefit.
