Fixed indexed account options²

S&P 500[®] indexed account options³

Indexed Account A – 100% participation	If you believe we will have a strong domestic economic environment, you may benefit from Indexed Account A.
Indexed Account B – 140% participation	If you think domestic economic growth will be modest, you may find Indexed Account B's crediting method favorable. (The percentage change in the S&P 500 [®] , up to the cap, is multiplied by 140 percent to determine the interest credits applicable.)

S&P 500[®] Low Volatility Indexed Account³

Indexed Account G – variable participation, uncapped⁴	Based on the 100 least volatile stocks in the S&P 500 [®] , this account provides the ability to take advantage of swings in the underlying index with an uncapped crediting rate.
-------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Guaranteed Interest Account

Earns interest daily at a fixed rate and credits a minimum of 2 percent growth annually.

Lifetime interest crediting guarantee

If the policy ends due to death, policy termination or surrender, money allocated to the Guaranteed Interest Account and the indexed accounts is guaranteed to be credited with at least the equivalent of a 2 percent effective annual interest rate. Guarantees are based on our company's financial strength and claims-paying ability.

1. Please keep in mind that there is no guarantee of subaccount growth. They are subject to risk, including possible loss of principal invested.

2. Crediting within these accounts will vary based on the movement of the investments within the S&P 500[®] Index and/or the S&P 500 Low Volatility Index.

3. Should the underlying index have 0 percent growth or decline, policy owners bear the risk that no index credit will be given to the account. Administrative and insurance charges are deducted every month regardless of whether premium outlays are made. Depending upon actual policy experience, the Owner may need to increase premium payments. Any policy loans and partial surrenders will affect policy values and may require additional premiums to avoid policy termination.

4. Uncapped indexed account participation rates are subject to change and may be less than 100%. This could have the impact of the indexed account credit being less than the change in the reference index. Guaranteed minimum participation floor of 30 percent with a guaranteed maximum participation rate of 200 percent.

Product features and availability may vary by state.

Variable life insurance products contain fees, such as mortality and expense charges, and may contain restrictions, such as surrender periods. There may also be underlying fund charges and expenses, and additional charges for riders that customize a policy to fit individual needs. Charges and expenses may increase over time. The variable investment options are subject to market risk, including loss of principal.

Policy loans and withdrawals may create an adverse tax result in the event of a lapse or policy surrender, and will reduce both the surrender value and death benefit. Withdrawals may be subject to taxation within the first 15 years of the contract. Clients should consult their tax advisor when considering taking a policy loan or withdrawal.

Please keep in mind that the primary reason to purchase a life insurance product is the death benefit.

All fixed indexed accounts available with VUL Survivor employ a point-to-point index crediting method with one-year index segments, established monthly. Credits for any index segment may range from 0% up to the maximum for that segment. This policy guarantees that the total interest credited over the life of the policy will not be less than a 2.00% effective annual interest rate. The underlying indices only recognize the changes in stock prices and do not include any

dividend returns. The policy and the Fixed Indexed Accounts do not actually participate in the stock market or the underlying indices. One cannot invest directly in an index.

FIDELITY, FIDELITY INVESTMENTS, FIDELITY INVESTMENTS and Pyramid logo, are registered service marks of FMR LLC. Used with permission.

"Standard & Poor's[®]," "S&P[®]," "S&P500[®]," "Standard & Poor's 500[®]," "Standard & Poor's MidCap 400[®]," and "S&P MidCap 400[®]" are registered trademarks of The McGraw-Hill Companies, Inc., and have been licensed for use by Securian Funds Trust. SFT Index 400 Mid-Cap and SFT Index 500 are not sponsored, endorsed, sold or promoted by Standard & Poor's and Standard & Poor's makes no representation regarding the advisability of investing in the Funds.

These sub-accounts seek investment results generally corresponding to the Index from which the sub-account takes its name. You may not invest directly in an Index.

Effective April 26, 2024, American Century VP Disciplined Core Value Fund was renamed LVIP American Century Disciplined Core Value Fund.

Effective April 26, 2024, American Century VP Inflation Protection Fund was renamed LVIP American Century Inflation Protection Fund.

*Effective May 1, 2024, this fund was renamed by removing Delaware lvy VIP from the name and replacing it with Macquarie VIP.

Each Macquarie VIP Pathfinder Series risk designation is relative only to the other Series and does not represent comparisons to any other investment.

The performance of each Macquarie VIP Pathfinder Series is dependent on the performance of its underlying funds, and each Series will assume the risks associated with its underlying funds. Because an investor is investing in funds indirectly through the Series, the investor will pay a proportionate share of the applicable expenses of the underlying funds, as well as the expenses of the particular Series. Please consult the prospectus for additional information about fees and expenses.

The Macquarie VIP Pathfinder Managed Volatility Series investment manager, Delaware Management Company (DMC), manages the investments in the underlying funds. An investment sub-advisor, Securian Asset Management, Inc., manages the volatility management strategy.

The Morningstar ETF Allocation Series Portfolios are not Exchange Traded Funds (ETFs), instead they consist of five risk-based asset allocation portfolios that invest in underlying ETFs, which are typically open-end investment companies or unit investment trusts. ETFs entail the same risks as direct stock ownership and portfolios structured as “fund of funds” will entail the same risks associated with the underlying funds and may have higher expenses than underlying funds purchased directly in the Separate Account.

Vanguard and/or the ship logo are trademarks of The Vanguard Group, Inc. The TOPS® Managed Risk & Target Range ETF Portfolios are managed by Valmark Advisers, Inc., and distributed by Northern Lights Distributors, LLC. and Milliman Financial Risk Management, LLC serves as the sub advisor. Northern Lights Distributors, LLC is not affiliated with Valmark Advisers, Inc., Milliman Financial Risk Management, LLC or Securian Financial Group.

The “S&P 500 Index” and “S&P 500 Low Volatility Index” are products of S&P Dow Jones Indices LLC, a division of S&P Global, or its affiliates (“SPDJ”) and have been licensed for use by Minnesota Life Insurance Company (Minnesota Life). Standard & Poor’s® and S&P® are registered trademarks of Standard & Poor’s Financial Services LLC, a division of S&P Global (“S&P”); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC (“Dow Jones”); and these trademarks have been licensed for use by SPDJI and sublicensed for certain purposes by Minnesota Life. The Indexed Universal Life Insurance Policy Series is not sponsored, endorsed, sold or promoted by SPDJI, Dow Jones, S&P, their respective affiliates and none of such parties make any representation regarding the advisability of investing in such product(s) nor do they have any liability for any errors, omissions, or interruptions of the S&P 500 Index and/or the S&P 500 Low Volatility Index.

Here is a list of some of the risks associated with the variable insurance product’s underlying investment choices. For specific risks related to each investment, see the prospectus.

Managed Volatility: Although Managed Volatility Portfolios seek to minimize the impact of market downturns, their hedging strategies may limit some upside potential. As with any variable subaccount option, investing in Managed Volatility Portfolios involves investment risk, including the loss of principal. Neither diversification nor asset allocation guarantee against loss, they are methods used to manage risk. Because these funds deploy an asset allocation strategy, investment risks may vary. One should consult the prospectus for details.

Small/Mid Cap Blend, Small/Mid Cap Growth and Small/Mid Cap Value: Investments in small, mid or micro cap companies involve greater risks not associated with investing in more established companies, such as business risk, stock price fluctuations, increased sensitivity to changing economic conditions, less certain growth prospects and illiquidity.

Real Assets: Consists of hard commodities, natural resources companies, Master Limited Partnerships (MLPs), infrastructure companies, and real estate, which exhibit low correlation to traditional asset classes, may provide excess returns, and serve as a hedge against inflation. These investments involve heightened risk and may be subject to leveraging and speculative practices, volatile market price fluctuations, and geopolitical events.

International Large Cap: Investment risks associated with international investing, in addition to other risks, may include currency fluctuations, political, social and economic instability and differences in accounting standards when investing in foreign markets.

U.S. Domestic Short/Intermediate/Long-Term Bond: Investments in fixed-income securities are subject to the creditworthiness of

their issuers and interest rate risk. As such, the net asset value of bond and real estate funds will fall as interest rates rise.

Asset Allocation: Neither diversification nor asset allocation guarantee against loss, they are methods used to manage risk. Because these funds deploy an asset-allocation strategy, investment risks may vary. One should consult the prospectus for details.

The asset classes used here are provided by Securian Financial Services, Inc. (“Securian Financial”). Securian Financial reviews and updates the analysis on an annual basis. Securian Financial Services uses holdings-based analysis as the primary determinant of investment style and asset class, but may supplement this analysis with returns-based style analysis or qualitative information. Holdings-based analysis is a technique that analyzes the underlying holdings of a fund to identify the overall style of the fund at a point in time or over a particular time period. Because the funds are classified according to their actual underlying holdings, the classification may not correspond to the stated investment style as described by the fund’s prospectus or other documents or by other ranking firms. A fund’s asset class category is subject to change at any time. You should read the fund’s prospectus carefully to understand the risks and objectives of the fund before you invest in it.
